SUBJECT INDEX

Acrylic acid, and acrylic amide, γ-radiation-initiated copolymerization of, in the solid, liquid, and supercooled liquid phase, 2667
graft copolymerization in aqueous dispersion of, on olefin copolymer, 2805
Acrylic amide and acrylic acid, γ-radiation-initiated copolymerization of, in the solid, liquid, and supercooled liquid phase, 2667
Acrylonitrile, kinetics and mechanism of radiochemical and photochemical grafting of, from the gaseous phase to polyamide fibers, 3033
avec le styrène dan des milieux de nature différente, copolymérisation radiochimique du, 3003
π-Allyl nickel halides, stereospecific polymerization of butadiene by catalysts from, 2525
Amorçage de la polymérisation des épisulfures par le naphthalène–sodium, méchanisme de, 3021
Amorphous high polymers, uniaxially stretched, anisotropy and structure in, 2751
Anisotropy and structure in uniaxially stretched amorphous high polymers, 2751
Aqueous dispersion, graft copolymerization in, of acrylic acid on olefin copolymer, 2805
Aromatic sulfide polymers, poly(2,5-thienylene sulfide), 2881
Association and charge interactions in polyelectrolyte solutions, 2955
Average functions of local conformations for non-interacting copolymer system with neighbor interactions, calculation of, 2815
Branched polyarylates, investigation of, 2649
Butadiene, stereospecific polymerization of, by catalysts from π-allyl nickel halides, 2525
stereospecific polymerization of, based on π-crotyl and cyclopentadienyl complexes of transition metals, 2625
Casting of transparent polyacrylonitrile, 2795
Catalysts from π-allyl nickel halides, stereospecific polymerization of butadiene by, 2525
Catalytic system $VCl_4Al(C_2H_5)_2Cl$, 2485
Cellulosexanthogenatsolen, Ordnungsvorgange bei der Gelbildung aus, 3047
Chain conformation and crystal structure of α-polymorphic form of poly(dimethyl ketene), 2867
Charge interactions and association in polyelectrolyte solutions, 2955
Compatibilité des copolymères avec les homopolymères correspondants, 2601
Complexes, π-crotyl and cyclopentadienyl, of transition metals, stereospecific polymerization of butadiene based on, 2625
à transfert de charge macromoléculaires, paramagnetisme de, 2963
Concentrated polymer solutions, gelation of, 2835
Conductivité, en courant continu des composés macromoléculaires, 2931
électronique et propriétés chimiques de polyanilines oligomères, 2943
Conformational features similar to those of high molecular weight compounds, molecular structures of low molecular weight model compounds with, 2877
Conformations, local, for non-interacting copolymer system with neighbor interactions, calculation of average functions of, 2815
Crosslinking, radiochemical, of polyolefins in presence of sulfur monochloride, 3041
π-Crotyl and cyclopentadienyl complexes of transition metals, stereospecific polymerization of butadiene based on 2625
Crystalline texture, orientation effects in polyethylene in light of, 2721
Crystal structure, and chain conformation of α-polymorphic form of poly(dimethyl ketene), 2867

of *trans*-polypentenamer, 2551
of syndiotactic polypropylene, 2477
Cyclopentadienyl and π-crotyl complexes of transition metals, stereospecific polymerization of butadiene based on, 2625
Cyklischer Polymerhomologer Reihen und Gewissen Spezifischen Grenzwerten Linearer, 2991
Deformation behavior, nonlinear, of rubberlike high polymers, phenomenological description of, 2893
Deuterated polypropenes, nuclear magnetic resonance analysis of, 2539
Diastereoisomeric compounds as possible models for stereospecific polymerization, 2905
Diäthylenglykolformals bei der kationischen Polymerisation, der Ringöffnungsmechanismus des, 2701
Dielectric properties, static, of dilute solutions containing macromolecules with polar flexible side chains, 2713
Dilute polymer solutions in general velocity field, hydrodynamic properties of, 2855
rheological behavior of, 2845
Dilute solutions containing macromolecules with polar flexible side chains, static dielectric properties of, 2713
Dispersion, aqueous, graft copolymerization in, of acrylic acid on olefin copolymer, 2805
Einstellvorgang bei osmotischen Messungen, 2681
Electron spin resonance on graft copolymerization, 2577
Elektronenmikroskopische Untersuchungen an hochpolymeren Lösungen, 2923
Elementary stages in propylene polymerization catalyzed by VCl_3–$Al(i\text{-}Bu)_3$, 2659
Emulsionspolymerisation von Vinylchlorid, zur Kinetik der, 2781
Épisulfures, mécanisme de l'amorçage de la polymérisation des, par le naphtalène-sodium, 3021
ESR studies on transient free radicals during redox polymerization of monomers, 2763
Fibers, polyamide, kinetics and mechanism of radiochemical and photochemical grafting of acrylonitrile from gaseous phase to, 3033
Films, polyurethane, effect of chemical structure of thermal, hydrolytic, and solvent resistance of, 2733
Free radicals, transient, ESR studies on, during redox polymerization of monomers, 2763
Fusion de zones à basse température, purification du *trans*-pentadiène-1,3 par, 2829
Gaseous phase, kinetics and mechanism of radiochemical and photochemical grafting of acrylonitrile from, to polyamide fibers, 3033
Gelation, of concentrated polymer solutions, 2835
isothermal, of polyacrylonitrile solutions, structural changes accompanying, 2835
Gewissen Spezifischen Grenzwerten Linearer und Cyklischer Polymerhomologer Reihen, 2991
Glassy polymers, yielding of, volume effects, 2981
Graft copolymerization, in aqueous dispersion of acrylic acid on olefin copolymer, 2805
electron spin resonance on, 2577
Grafting, radiochemical and photochemical, of acrylonitrile from gaseous phase to polyamide fibers, kinetics and mechanism of, 3033
Halides, π-allyl nickel, stereospecific polymerization of butadiene by catalysts from, 2525
Helical macromolecules, helix–coil transition in, 2773
Helix–coil transition in helical macromolecules, 2773
High molecular weight compounds, molecular structures of low molecular weight compounds with conformational features similar to those of, 2877
Homopolymères avec les copolymères correspondants, compatibilité des, 2601
Hydrodynamic properties of dilute polymer solutions in general velocity field, 2855
Hydrolytic, thermal, and solvent resistance of polyurethane films, effect of chemical structure on, 2733

Inclusion compounds of linear polymers and polymerization of monomers included in perhydrotriphenylene, 2517
Interactions, neighbor, calculation of average functions of local conformations for a non-interacting copolymer system with, 2815
Isoprène, polymérisation de, en présence de strontium, 2825
Isotactic polymers, polymerization mechanism of α-olefins to, 2501
Isothermal gelation of polyacrylonitrile solutions, structural changes accompanying, 2835
Kinetics and mechanism of radiochemical and photochemical grafting of acrylonitrile from gaseous phase to polyamide fibers, 3033
Lichtstreuung an Lösungen verzweigter Makromoleküle, 2913
Linear polymers, inclusion compounds of, and polymerization of monomers included in perhydrotriphenylene, 2517
Liquid, solid, and supercooled liquid phase, γ-radiation-inititated copolymerization of acrylic acid and acrylic amide in, 2667
Liquid and solid states, γ-radiation-initiated polymerization of *N*-vinylsuccinimide in, 2583
Local conformations for non-interacting copolymer system with neighbor interactions, calculation of average functions of, 2815
Low molecular weight model compounds with conformational features similar to those of high molecular weight compounds, molecular structures of, 2877
Mechanism, and kinetics of radiochemical and photochemical grafting of acrylonitrile from gaseous phase to polyamide fibers, 3033
polymerization, of α-olefins to isotactic polymers, 2501
Mesomorphous and supercooled liquid phase, radiation polymerization in, 2675
Metals, transition, π-crotyl and cyclopentadienyl complexes of, stereospecific polymerization of butadiene based on, 2625
Milieux vitreux à basse température, polymérisations et copolymérisations radiochimiques dans, 3011
Model compounds, low molecular weight with conformational features similar to those of high molecular weight compounds, molecular structures of, 2877
Monomers, ESR studies on transient free radicals during redox polymerization of, 2763
included in perhydrotriphenylene, polymerization of, and inclusion compounds of linear polymers, 2517
solid, shock-wave polymerization of, 2597
Naphtalène-sodium, mécanisme de l'amorçage de la polymérisation des épisulfures par, 3021
Neighbor interactions, calculation of average functions of local conformations for a non-interacting copolymer system with, 2815
Nickel halides, π-allyl, stereospecific polymerization of butadiene by catalyst from, 2525
Non-interacting copolymer system with neighbor interactions, calculation of average functions of local conformations for, 2815
Nonlinear deformation behavior of rubberlike high polymers, phenomenological description of, 2893
Nuclear magnetic resonance analysis of deuterated polypropenes, 2539
Nucleophilen Reagentien, die chemische umsetzung des polyvinylchlorid mit, 3059
Olefin copolymer, graft copolymerization in aqueous dispersion of acrylic acid on, 2805
α-Olefins to isotactic polymers, polymerization mechanism of, 2501
Ordnungsvorgange bei der Gelbildung aus Cellulosexanthogenatsolen, 3047
Orientation effects in polyethylene in light of crystalline texture, 2721
Paramagnétisme de complexes à transfert de charge macromoléculaires, 2963
trans-Pentadiéne-1,3, purification du, par fusion de zones à basse température, 2829

Perhydrotriphenylene, polymerization of monomers included in, and inclusion compounds of linear polymers, 2517
Phenols, polyatomic, synthesis of polyhydroxyphenylenes from, 2615
Phenomenological description of nonlinear deformation behavior of rubberlike high polymers, 2893
Photochemical and radiochemical grafting of acrylonitrile from the gaseous phase to polyamide fibers, kinetics and mechanism of, 3033
Polar flexible side chains, static dielectric properties of dilute solutions containing macromolecules with, 2713
Polyacrylonitrile, transparent, casting of, 2795
Polyacrylonitrile solutions, structural changes accompanying isothermal gelation of, 2835
Polyamide fibers, kinetics and mechanism of radiochemical and photochemical grafting of acrylonitrile from gaseous phase to, 3033
Polyanilines oligomères, conductivité électronique et propriétés chimiques de, 2943
Polyarylates, branched, investigation of, 2649
Polyatomic phenols, synthesis of polyhydroxyphenylenes from, 2615
Polycoordination reaction, regularities of, 2565
Poly(dimethyl ketene), α-polymorphic form of, crystal structure and chain conformation of, 2867
Polyelectrolyte solutions, charge interactions and association in, 2955
Polyethylene, orientation effects in, in light of crystalline texture, 2721
Polyhydroxyphenylenes from polyatomic phenols, synthesis of, 2615
Polyméthacrylate de méthyle–polystyrène, système de, 2601
α-Polymorphic form of poly(dimethyl ketene), crystal structure and chain conformation of, 2867
Polyolefins, radiochemical crosslinking of, in presence of sulfur monochloride, 3041
Polyoxadiazoles, synthesis and investigation of, 2635
trans-Polypentenamer, crystal structure of, 2551
Polypropenes, deuterated, nuclear magnetic resonance analysis of, 2539
Polypropylene, syndiotactic, crystal structure of, 2477
Polystyrène–polyméthacrylate de méthyle, système de, 2601
Poly(tetrafluoroethylene)–styrene system, 2577
Poly(2,5-thienylene sulfide), 2881
Polyurethane films, effect of chemical structure of thermal, hydrolytic, and solvent resistance of, 2733
Polyvinylchlorid mit Nucleophilen Reagentien, die chemische umsetzung des, 3059
Propylene polymerization catalyzed by VCl_3–$Al(i\text{-}Bu)_3$, elementary stages in, 2659
Propylene to syndiotactic polymer, 2485
Purification du *trans*-pentadiène-1,3 par fusion de zones à basse température, 2829
Radiation-induced solid-state polymerization, 2667
γ-Radiation-initiated copolymerization of acrylic acid and acrylic amide in the solid, liquid, and supercooled liquid phase, 2667
γ-Radiation-initiated polymerization of *N*-vinylsuccinimide in liquid and solid states, 2583
Radiation polymerization in supercooled liquid and mesomorphous phase, 2675
Radiochemical crosslinking of polyolefins in presence of sulfur monochloride, 3041
Radiochemical and photochemical grafting of acrylonitrile from the gaseous phase to polyamide fibers, kinetics and mechanism of, 3033
Redox polymerization of monomers, ESR studies on transient free radicals during, 2763
Regularities of polycoordination reaction, 2565
Resistance, thermal, hydrolytic, and solvent, of polyurethane films, effect of chemical structure on, 2733
Rheological behavior of dilute polymer solutions in general velocity field, 2845
Ringöffnungsmechanismus des Diäthylenglykolformals bei der kationischen Polymerisation, 2701

Rubberlike high polymers, phenomenological description of nonlinear deformation behavior of, 2893
Shock-wave polymerization of solid monomers, 2597
Side chains, polar flexible, static dielectric properties of dilute solutions containing macromolecules with, 2713
Sodium-naphthalène, mécanisme de l'amorçage de la polymérisation des épisulfures par, 3021
Solid, liquid, and supercooled liquid phase, γ-radiation-initiated copolymerization of acrylic acid and acrylic amide in, 2667
Solid and liquid states, γ-radiation-initiated polymerization of *N*-vinylsuccinimide in, 2583
Solid monomers, shock-wave polymerization of, 2597
Solid-state radiation-induced polymerization, 2667
Solutions, concentrated polymer, gelation of, 2835
  dilute, containing macromolecules with polar flexible side chains, static dielectric properties of, 2713
  dilute polymer, in general velocity field, hydrodynamic properties of, 2855
    in general velocity field, rheological behavior of, 2845
  polyacrylonitrile, structural changes accompanying isothermal gelation of, 2835
  polyelectrolyte, charge interactions and association in, 2955
  polymer, properties of, 2693
Solvent, thermal, and hydrolytic resistance of polyurethane films, effect of chemical structure on, 2733
Static dielectric properties of dilute solutions containing macromolecules with polar flexible side chains, 2713
Stereospecific polymerization, diastereoisomeric compounds as possible models for, 2905
Stereospecific polymerization of butadiene, based on π-crotyl and cyclopentadienyl complexes of transition metals, 2625
  by catalysts from π-allyl nickel halides, 2525
Strontium, polymérisation de l'isoprène en présence de, 2825
Structural changes accompanying isothermal gelation of polyacrylonitrile solutions, 2835
Structure, and anisotropy in uniaxially stretched amorphous high polymers, 2751
  chemical, effect of, on thermal, hydrolytic, and solvent resistance of polyurethane films, 2733
  molecular, of low molecular weight compounds with conformational features similar to those of high molecular weight compounds, 2877
Styrène avec l'acrylonitrile dan des milieux de nature différente, copolymérisation radiochimique du, 3003
Styrene–poly(tetrafluoroethylene) system, 2577
Styrol auf Polyäthylen durch verschiedene Initiierungsmethoden, Vergleichende Untersuchungen der Pfropfung von, 2973
Sulfide polymers, aromatic, poly(2,5-thienylene sulfide), 2881
Sulfur monochloride, radiochemical crosslinking of polyolefins in presence of, 3041
Supercooled liquid, liquid, and solid phase, γ-radiation-initiated copolymerization of acrylic acid and acrylic amide in, 2667
  and mesomorphous phase, radiation polymerization in, 2675
Syndiotactic polymer, propylene to, 2485
Syndiotactic polypropylene, crystal structure of, 2477
Synthesis and investigation of polyoxadiazoles, 2635
Synthetische Lineare Polymere, 2991
Texture, crystalline, orientation effects in polyethylene in light of, 2721
Thermal, hydrolytic, and solvent resistance of polyurethane films, effect of chemical structure on, 2733
Transient free radicals, ESR studies on, during redox polymerization of monomers, 2763
Transition metals, π-crotyl and cyclopentadienyl complexes of, stereospecific polymerization of butadiene based on, 2625

Transparent polyacrylonitrile, casting of, 2795
Uniaxially stretched amorphous high polymers, anisotropy and structure in, 2751
VCl_3–$Al(i\text{-}Bu)_3$, elementary stages in propylene polymerization catalyzed by, 2659
VCl_4–$Al(C_2H_5)_2Cl$ catalytic system, 2485
Velocity field, general, hydrodynamic properties of dilute polymer solutions in, 2855
general, rheological behavior of dilute polymer solutions in, 2845
Vergleichende Untersuchungen der Pfropfung von Styrol auf Polyäthylen durch verschiedene Initiierungsmethoden, 2973
Vinylchlorid, zur Kinetik der Emulsionspolymerisation von, 2781
N-Vinylsuccinimide in liquid and solid states, γ-radiation-initiated polymerization of, 2583
Yielding of glassy polymers, volume effects, 2981
